

Screen name	Screen ID	Status

Basic information about the app and this document

- App's operating environment: Android, iPhone, iPad
- UI: English default and Korean support at this moment
- App's word: English default and Korean support at this moment
- Information input: world wide many local language support needed.
- Electronic name card in the app needs to be generated meeting professional printing requirement(see http://www.psprint.com/helpcenter/preparing_artwork_files/index.asp)
- This screen shot of the document describes just the concept for clear communication to developers, so better and detailed UI design is required and needs to be suggested for real implementation.
→ Some screen flow which can be inferred was omitted for the convenience.
- The usage of server side needs to be minimized in order to protect personal information and minimize operation cost like traffic charge. If needed significantly, would like to offer users as charging service. (for example, direct music/video streaming instead of referring to music/video site link)
- The app needs not to infringe on Snapdat Networks, Inc.'s US patent 8078205 B2.

ABC card

Good bye to paper business card.
From now on you can make, send
and share the beautiful and
convenient electronic name card.

If you are not good at designing
electronic card nor satisfied with the
templates, you can order the
professional design service at ABC
Card.

- While app is being launched, this screen pops up
- The design needs to look like real business card book.

Please select the type of the card for your purpose.				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Official </div>				
<p>Mainly for the business</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Personal </div>				
<p>Mainly for friends</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Open Public </div>				
<p>For mass media</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Secret </div>				
<p>Only for me</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Greetings </div>				
<p>New year, Christmas</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Life Event </div>				
<p>Wedding, Birthday</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				
<div style="border: 1px solid blue; padding: 5px; display: inline-block;"> Advertising </div>				
<p>Event coupon, Stamp coupon, etc.</p> <div style="border: 1px solid blue; padding: 5px; display: inline-block;"> New Card </div>				

- User selects the category of name card and then make new cards there.
 - Official – for official life such as business activities
 - Personal – for personal life such as hobby club, etc.
 - Open Public – public name card which can be searched in the app even though it is not exchanged. Probably It will consist of the information which user can want many people to know.
 - Secret – No exchange of this card. For user only. For a kind of diary and planner.
 - User can make the business name card of the future. On it user can write the plan to achieve the future job.
 - Greetings: for greetings card
 - Life event: for life event-related activities
 - Advertising – any kind of card for advertising as charging service. This category needs to support commercial tools for activity like electronic stamping on the coupon.

- In the News there will be any information which the owner of the card posted with the option that other persons' comment will show up or not.
- In the History, there will be the history of activities related to the selected card between the user and its owner like sending/receiving/exchanging/sharing/updating, meeting, scheduling, conferencing, etc.

Screen name	Detailed view of other person's namecard	Screen ID		Status
-------------	--	-----------	--	--------

The screenshot shows a mobile application interface. At the top, there is a navigation bar with five tabs: Address book (highlighted in yellow), My Card, Incoming, Tools, and Settings. Below the navigation bar, there is a section titled "History" which is currently empty. To the left of the history section, there is a "Front" and a "Back" button, both of which are greyed out. The "Front" button is positioned below a thumbnail of a namecard for "John Smith". The "Back" button is positioned below the "Front" button. The "Back" button is also greyed out. The namecard for "John Smith" displays the following information:

- John Smith (Production manager)
- Tel: 123-456-7890
- Cell: 555-456-7890
- Fax: 223-456-7890
- Email: john@abc-company.com
- ABC COMPANY
- 123 Anywhere St.
Somewhere Somewhere
A1B 2C3
www.abc-company.com

Below the namecard, there is a "News" tab, a "Messages(2)" tab (highlighted in yellow), a "Memo & Schedule" tab, and a "Tools" tab.

The main area of the screen shows a messaging conversation with "John Smith". The messages are:

- John Smith: 밥솔에 밥 있어요 있는 반찬하고 먹어야~^^ 오전 10:06
- Me: 감사 감사 이미 밥 먹고 집중중 😊 오전 10:07

- In the Schedule, the user can see the schedule which the owner of card posted and shared or switch to the view of my schedule related to the owner of card.
 - The user can ask for arrangement with the owner of the card on the other person's schedule view or my schedule view. When user write the schedule on my scheduler, he or she can write only the description of the arrangement or ask for the arrangement in it. So my scheduler will have the status of arrangement with the flags like just plan, being asked and confirmed. This similar actions apply to the other persons' schedule view.
- The purpose of this Schedule is to help people to know each others' schedule and arrange the meeting easily.

			<ul style="list-style-type: none"> • In the Tools directory, there will be huge application tools to help p2p-based business/commerce transaction based on the name card. • Eventually I target this app is a kind of default address book regardless of any platform in the world-wide, which can be synchronized with many potential tool apps. So I would like to have standard API for 3rd parties to be synchronized with ABC card like Zoho. • In phase 1, would like to focus on essential tools. <ul style="list-style-type: none"> • Memo, Calendar Scheduler <ul style="list-style-type: none"> • personal calendar and open calendar matching the card which the recipient can see. • Meeting minutes • ABC card paid service <ul style="list-style-type: none"> • Track order service status about ABC card • Cancel order and so on • Inquiry • Expense Tracker • Relationship statistics <ul style="list-style-type: none"> • How much time spent for someone, How much money spent, How much communication period... • Ranking by expenses, call time and so on. • In phase2, would like to focus on more commercial tools <ul style="list-style-type: none"> • Invoice, Payment, Document Signing, Project, Escrow, Certification, Recruit and so on • Later ITECG and me will work together in the long term basis. • Detailed about each app in the Tools directory needs to be suggested by ITECG.

- Details about Settings need to be suggested by ITECG considering configurable information.
 - Password lock for security
 - Function to prevent private information leak in case of loss of cellular phone like typical locker
 - About Sign up
 - Automatic update of change name card in the side of recipient side or not
 - And so on

Screen name	Calling or Receiving Screen	Screen ID		Status
